

**Lab space to meet your business needs**

Here at the BDC we have state-of-the-art research and development biorefinery facilities and flexible office space available for hire.

All our lab facilities are open access, if you know what you want to do but do not have the equipment to do it, then we can arrange for you to spend time in our labs working alongside our experienced team.

This can be on an ad hoc basis or a longer-term license for shared occupation which can also include your own dedicated office space. In our process development lab we have a 480sqft flexible hall, if you have a piece of equipment that needs the right infrastructure and dedicated space to make it work then our flexi hall could be the right place for it. The flexi hall has access to compressed air, N2 supply, steam, vacuum, chilled water, water and drainage services as well as a three phase power supply.

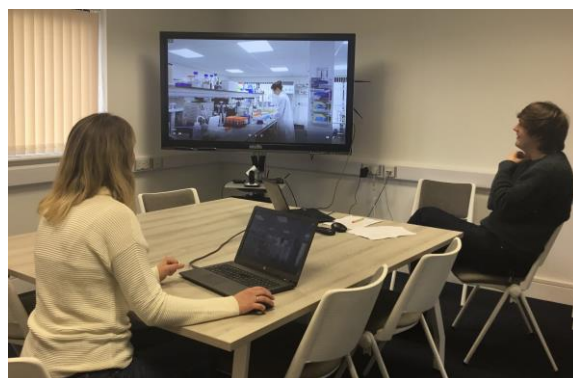

**Get in touch**

We have the facilities, managed space and expertise to help you innovate, scale up and grow.

To find out what we currently have available contact our Business Operations Team on 01904 328040 or email [biorenewables@york.ac.uk](mailto:biorenewables@york.ac.uk)
