

# Pre-funded projects available to help Yorkshire businesses

To help overcome your technical barriers, we have a range of pre-funded support programmes including European Regional Development Fund (ERDF) funding and other business advisory programmes.

In addition, our pilot scale lab facilities and flexible office space are available for short and long-term hire. If you know what you want to do but don't have the equipment or expertise to do it, we can look at options for you to spend time alongside our experienced technical teams.

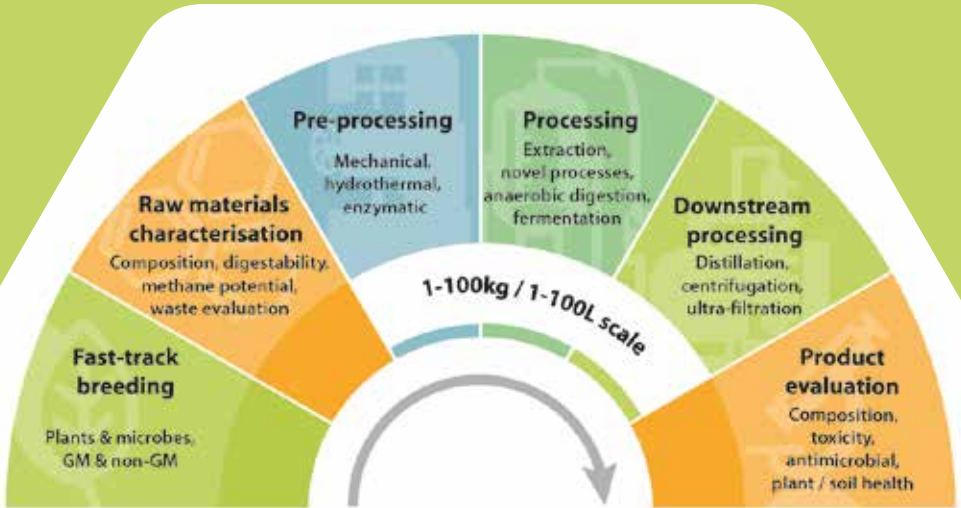

“Using recycled plastic planks to grow plants through hydroponics – HydroBlox Ltd

*The BDC's work has been crucial for us to move into a new market, and best of all: it was fully funded through their ERDF programme!*

Patrick O'Neil, Technical Director”

# Work with us

The BDC is an open-access biorefinery R&D centre in York, UK, working at the interface between academia and industry to develop scale-up and help commercialise bio-based products and processes.

## BIO-REFINING R&D at the BDC

Offering a full support package, we also have a team of innovation advisers for those looking to develop their bio-based products or processes further than the lab;

Market research and project management

Building partnerships and collaborations

Regulatory scanning

Developing entrepreneurial skills

Specialist sector business advice

Communication and marketing advice

Bid development and commercialisation

Access overseas markets to help  
build bio-based supply chains and  
inward investment
